C

Read the text and chose the correct answer to complete each sentence.

Since the beginning of time, humans have looked up at the moon and dreamed of travelling there. As science and technology developed, the possibility of making that journey a reality. On the 20th of July 1969, three Americans Buzz Aldrin, Neil Armstrong and Michael Collins flew to into the Moon's orbit, and while Collins stayed behind, Aldrin and Armstrong became the first people to walk on its surface.

They weren't the first living creatures from Earth to enter space though. From 1955 to 1969, the Soviet Union and the USA carried out increasingly ambitious missions into space, know as the Space Race. In 1957, Laika a dog from the USSR, became the first animal to orbit the Earth. Two more dogs from the same country made the journey and returned safely to Earth before the first American animal, a chimpanzee named Ham, travelled into space and back in 1961.

1. The first creature in space was

- a) a dog b) a chimpanzee c) a human
